Handoff 50: The book and course outline, expanded (master run WE11, DOC-03)

Date: 2026-11-09 (America/Toronto)
Written by: Claude Code (implementer), in a separate git worktree
For: the human maintainer, and ChatGPT or Claude chat (reviewer) without repository access
Status: **in_review**: one pull request, documentation only, not merged. Nothing decided.

> **How to use this file:** upload it with `docs/plan/engineering-book-outline.md` and `docs/plan/decision-log.md`. The pull request diff is the source of truth (`build.md` section 14).

Starter prompt for the chat assistant

```
You are reviewing an expanded outline for a book and a CS50-style course built from Python
Academy's decision log. Check that every "what broke" in section 2.1 is a real bug from the
log or
the handoffs it names, that each exercise can be done safely in a practice copy with free
tools,
and that the chapter order would make sense to a first-year student.
```

Run plan details

Field	Value
Stage	WE11: DOC-03
Base	`main`, at `1dc4b59`
Part 2 boxes relied on	**None**

1. Handoff record

Field	Value
Task	Expand the book and course outline from the decision log
Human goal	When the book is written, every chapter already knows its sources and its worked example
Non-goals	Writing any chapter; deciding publication

Field	Value
Deployment status	None: documents only. Commits carry `[skip render]`

Files changed: `docs/plan/engineering-book-outline.md`, `docs/run-log.md`, this handoff and its PDF.

2. What changed

Where	Change
Section 2, the parts	From 16 chapters in 7 parts to 27 in 10. New: feedback, honest lessons, privacy and trust, growing the checker, supply chain and operations, accessibility
Section 2.1 (new)	For each new chapter: what the reader builds, the real bug used as the worked example, and an exercise
Section 3, the course	Weeks 11 to 13: feedback and honest lessons, privacy by design, supply chain and accessibility
Section 5	Notes that the repository is now public, which bears on question 2

3. How it was checked

Each "what broke" in section 2.1 was taken from decision-log chapters 14 to 22 or the handoffs named, and the handoff numbers were checked against `docs/handoffs/`. **Handoffs 44 to 49 are on open pull requests** (#52 to #57); the outline says chapters built on them wait until they are merged.

A slip in my first draft: one row cited "handoffs 29, 41, 45 to 46 of the first batch", which doesn't exist. Corrected to 29, 40 and 41.

4. Questions for you

Section 5 of the outline has the four open decisions (audience, repository access, format, order). None is answered here.

5. For the docs sync

Where	What
Backlog	DOC-03 `in_review` (#PR, handoff 50)

6. Next concrete action

Review, and merge if you accept the outline.

7. Removing the worktree safely

```
cd /Users/DEV/Projects/python-academy
git -C ../python-academy-book status --short   # expect nothing
git worktree remove ../python-academy-book
git worktree prune
git branch -d docs/book-outline
```
