Handoff 51: Docs sync after handoffs 38 to 50

Date: 2026-11-09 (America/Toronto)
Written by: Claude Code (implementer), in a separate git worktree
For: the human maintainer, and ChatGPT or Claude chat (reviewer) without repository access
Status: **in_review**: one pull request (#59), documentation only, not merged. Facts only; nothing decided.

> **How to use this file:** upload it with `docs/plan/backlog.md` section 1 and `docs/plan/decision-log.md`. The pull request diff is the source of truth (`build.md` section 14).

Run plan details

Field	Value
Stage	A docs sync, like S01 and handoff 38
Base	`main`, at `1dc4b59`
Part 2 boxes relied on	**None**

1. What changed

File	Change
`backlog.md` section 1	Stage rows 38 to 51. Rows 35 and 38 now say merged
`backlog.md`, live checks	New: (p) file fixtures, (q) Dependabot, recorded as seen, (r) the keyboard fix, (s) learner files
`backlog.md` section 5	ENG-06, ENG-08, ENG-08b, ENG-10, SEC-05, SEC-06, ENG-11, EDU-01, EDU-02, EDU-10, QA-01 and QA-03 updated. **DOC-03 added**: the master run names it in stage WE11, and there was no row
`decision-log.md`	"Master run, third batch (handoffs 38 to 50)", and six new rows under "Open, awaiting the owner"
`docs/run-log.md`	One copy for every open run branch, with every stage's row and entry

Status words follow `build.md` section 18. Nothing is `verified`: no live check was recorded. PRs #52 to #58 are `in_review`, not merged.

2. The run log on every open branch

Each open branch had added its own entry at the end of `docs/run-log.md`, so any two would have conflicted there. This PR's copy holds every entry, and the same copy is committed to #52 to #58, so they merge in any order.

3. How it was checked

Check	Result
Every PR number and merge date	Against `gh pr list --state all`
Every handoff number	Against `docs/handoffs/`
Links in the changed files	Checked to exist

4. Questions for you

None new. The decision log's "Open, awaiting the owner" table has them all.

5. Next concrete action

Merge this with, or after, #52 to #58, in any order.

6. Removing the worktree safely

```
cd /Users/DEV/Projects/python-academy
git -C ../python-academy-sync5 status --short   # expect nothing
git worktree remove ../python-academy-sync5
git worktree prune
git branch -d docs/backlog-sync-5
```
